

# CALEMARD

by Spoolex Group

## Your winding expert!

Booth 475  
Hall A6

### Flexibility

Always based on three modules (unwinding, slitting, winding), each Calemard's equipment is multi-purposes and can convert **thick or thin materials into pads or spools of wide or narrow strips.**

### Reliability

Our process expertise allow us to design machines with sensitive web tension control and guiding systems, to manage, depending on the product to be converted, **high, low and even extremely low tension on the same machine.**

### Quality

The result is compact rolls with consistent tension, clean and straight edges for easy use on downstream manufacturing process.

**Let us control your tension and engineer your customized solution!**
